

Provider Clearance Process

Shock Trauma Release Points

The "ALS Preceptor Evaluation Form" is the guideline for awarding points. Preceptors should write comments as applicable.

- Not every area will have points awarded on every call. Preceptors should write NA when points are not awarded.
- The Jr. Shock Trauma technician should be present when the preceptor fills out the evaluation form. This will allow the call to be critiqued and learning maximized. Once the evaluation tool is complete, the Jr. ST will keep it, a copy of the call sheet and airway forms when applicable.
- All forms should be turned in to one of the Prehospital Coordinators. If airway points are the only missing points, contact the Prehospital Coordinators to discuss your release.

Scene Management	25 points
Patient Assessment	25 points
Airway Maintenance*	9 points
Circulation	15 points
Medications**	15 points
<hr/>	
Total	89 points

*Airway points should only be awarded when true airway management is done such as suctioning, O.P./N.P./Combitube/E.T. insertion. Placing the patient on oxygen does not earn points.

** At least two medications must be other than nitroglycerine, ASA or Albuterol.

Provider Clearance Process (continued)

EMT to Cardiac/Paramedic Release Points

The "ALS Preceptor Evaluation Form" is the guideline for awarding points. Preceptors should write comments as applicable. Jr. Cardiac technicians must run a minimum of 20 ALS calls and a minimum of 4 months as a Jr. CT.

- Not every area will have points awarded on every call. Preceptors should write NA when points are not awarded.
- The Jr. Cardiac technician should be present when the preceptor fills out the evaluation form. This will allow the call to be critiqued and learning maximized. Once the evaluation tool is complete, the Jr. ST will keep it, a copy of the call sheet and airway forms when applicable.
- All forms should be turned in to one of the Prehospital Coordinators. If airway points are the only missing points, contact the Prehospital Coordinators to discuss your release.

Scene Management	50 points
Patient Assessment	50 points
Airway Maintenance*	25 points
Circulation	25 points
Medications**	25 points
EKG Interpretation	25 points
<hr/>	
Total	200 points

*Airway points should only be awarded when true airway management is done such as suctioning, O.P./N.P./Combitube/E.T. insertion. Placing the patient on oxygen does not earn points.

** Medication points are awarded for medications other than nitroglycerine and Albuterol.
